about me

My name is Ibolya vojtek

I'm currently residing in Krems an der Donau and doing my informatics bachelor at IMC Krems there

my hobbies include game development and photography

This site is a passion project of mine and nearly 100% of the content here was written by me, and no one else.
I have no staff, editors, or people doing the work for me. I welcome feedback of any kind, even when I get something wrong. If you'd like to get in touch, you can use the contacts at the top of every page

"Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur.

"But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?"

Kentmere 200

The best general purpose film I've seen

The leadup

This film originally released on the summer of 2023 which was unideal for me since I reserve that time for lower iso film but nonetheless the thought of another readily available 200 iso film saving me was extremely exciting especially if it could save me relying on Fom 200 anymore.

Since the days are getting shorter now would be the perfect time to get some 200 film and shoot (as right)

The shooting experience

200 ISO is in my sweet spot for film sensitivity, it accommodates for more situations than 100 or 50 ISO film while still having a tight grain structure and the sense that I'm not wasting any of its sensitivity when shooting in brighter light.

which makes it even stranger to me how it's a relative rarity among the films, while color shooters are spoiled for choice with seemingly every new attempt at color film being 100, 200, 400 and while shooters have historically had a very small set of options for them and other than Fom 200 the only other options were Triang film like Ilford sfx200 or the Rollei duopan 200 which is while I'm delighted about getting new options.

Image quality

this image really shows the raw amount of resolution you can get with speed00

Kentmere pan 200 is much closer to its Ilford brothers than something like a pan 180. It doesn't have very little grain and also the modeling contrast or softness that often describes something like the d100 160 but for a much lower cost. I prefer to develop it in compensating developer to bring forth the flexibility in terms of lighting you can achieve with 200 it handles much even gray objects really well especially required in its most direct exposure (not like 200 on walls).

Kentmere pan 200 definitely has risen to my go to film stock thanks to this tonight

secondary education:	MTAG Bratislava
higher education:	currently undertaking my bachelors degree in informatics at IMC Krems
work experience:	2 months of running the Senec firefighting museum
Language skills:	Hungarian: native speaker English: fluent slovak: good german: good
computer experience:	familar with: office, excel, powerpoint, python, and c
personal skills:	works well under pressure, quickly executes when told to, works well in a team
Interests:	Reading, game developement, cycling, gaming, analog and digital photography
Further infomration:	The world is full of the unexplainable: ancient magic, dead gods, and even stranger things. In response, you've scavenged the best parts of every magical tradition and built up a collection of esoterica –a broken holy relic here, a sprig of mistletoe there– that you can use to best any creature by exploiting their weaknesses and vulnerabilities. The mystic implement you carry is both badge and weapon, its symbolic weight helping you bargain with and subdue the supernatural. Every path to power has its restrictions and costs, but you turn them all to your advantage. You're a thaumaturge, and you work wonders.

Kentemere 200

The best general
purpose film I've
seen

The leadup

This film originally released
on the summer of 2025 wich was
unideal for me since I reserve
that time for lower iso film
But nontheless the tought of
nother readily avaliabe 200 iso
film coming out was extremely
exciting especially if it would
mean not relying on foma 200
anymore.

Since the days are getting
shorter now would be the
perfect time to get some 200
film and damm I was right

The shooting experience

200 ISO is in my sweet spot for
film sensitivity, it
accommodates for more
situations than 100 or 50 ISO
film while still having a tight
grain structure and the sense
that I'm not wasting any of its
sensitivity when shooting in
brighter light.

which makes it even stranger to
me how it's a relative rarity
among bw films, while color
shooters are spoiled for choice
with seemingly every new
attempt at color film being ISO
200. Black and white shooters
