about me

My name is Ibolya vojtek

I'm currently residing in Krems an der Donau and doing my informatics bachelor at IMC Krems there

my hobbies include game development and photography

This site is a passion project of mine and nearly 100% of the content here was written by me, and no one else.

I have no staff, editors, or people doing the work for me. I welcome feedback of any kind, even when I get something wrong. If you'd like to get in touch, you can use the contacts at the top of every page

"Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. "But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?"

Kentemere 200

The best general purpose film I've seen

The leadup

This film originally released on the summer of 2025 wich was unideal for me since I reserve that time for lower iso film But nontheless the tought of nother readily avaliabe 200 iso film coming out was extremely exciting especially if it would mean not relying on foma 200 anymore.

Since the days are getting shorter now would be the perfect time to get some 200 film and damm I was right

The shooting experience

200 ISO is in my sweet spot for film sensitivity, it accommodates for more situations than 100 or 50 ISO film while still having a tight grain structure and the sense that I'm not wasting any of its sensitivity when shooting in brighter light.

which makes it even stranger to me how it's a relative rarity among bw films, while color shooters are spoiled for choice with seemingly every new attempt at color film being ISO 200. Black and white shooters have historically had a very small set of options for them and other than Foma 200, which is Foma 200 the only other options were fringe films like Ilford sfx200 or or Rollei superpan 200 which is while I'm delighted about getting new options.
